

# element61 SAP Business Analytics & Performance Management Day 2021

Date : November 18th, 2021 | Venue: Virtual | Time : 14.00 - 17.30

Timing	Description	
14.00 - 14.15	<b>Log-in &amp; discover our Virtual Event Platform</b>	
14.15 - 15.00	<b>INTRO + BI1. Learn how SAP is helping organizations to become data-driven in Today's reality</b>	
	 <p>In today's reality many organizations have begun their transformations into intelligent enterprises. New technologies and applications are not only generating large volumes of data, but they are also causing new challenges in how these enterprises can get to the value of all that data. SAP Analytics Technologies can help to give data impact. Transforming this full process into an agile fast self-service process organizations will unlock the business potential of your full enterprise data.</p> <p><b>Frederic de Schutter, Partner Business Analytics - element61 &amp; Stijn Debever, SAP Analytics Solution Advisor - SAP Belgium &amp; Luxembourg</b></p>	
15.05 - 15.50	<b>BI &amp; Planning Track</b> <b>BI2. SAP Analytics Cloud in action for stock projections in a Food company</b>  <p>During this session we will explain why this major player in the food industry has selected SAP Analytics Cloud for BI reporting and will demonstrate how they use SAP Analytics Cloud to check the stock levels of all aggregated demand requirements on warehouse level as well as the stock coverage for the coming 15 weeks. Next to this element61 will also demonstrate how APOS Live gateway can be used to report in real time on Azure SQL data.</p> <p><b>Nico Sacré, Partner SAP Business Analytics - element61</b></p>	<b>Consolidation Track</b> <b>CONSO1. How to start your SAP S/4HANA Group Reporting journey ?</b>  <p>SAP S/4HANA Group Reporting is SAP's go-forward Consolidation &amp; management reporting solution. It is designed to improve and streamline the Group close and supports an organization's finance department by collecting, processing and presenting their consolidated financial statements. During this session we will explain possible options to move your consolidation to SAP S/4HANA Group Reporting and share insights, lessons learned and best practices resulting from our first S/4HANA Group Reporting projects.</p> <p><b>Klaas van de Geest, Director Innovation &amp; Excellence - EPM International &amp; Bjorn Van Damme, Partner Business Analytics - element61</b></p>
	<b>Virtual Coffee Break</b>	
16.00 - 16.40	<b>BI &amp; Planning Track</b> <b>PLAN2. Workforce planning and reporting in SAP Analytics Cloud and SAP BW/4HANA at 50Hertz</b>  <p>50Hertz Transmission GmbH, part of the Elia Group, distributes electricity networks. The Company produces and supply electricity, transmission grids, power generators, and transmission systems.</p> <p>In this session we will explain how SAP Analytics Cloud is used for resource planning on 50Hertz projects.</p> <p>This planning process is performed by the different departments using the native SAP Analytics Cloud web interface but also Analysis for Office (Excel). Output of the planning process is retracted to SAP BW for further processing.</p> <p><b>Customer &amp; Sam Reynders, Competence Lead SAP Business Analytics - element61</b></p>	<b>Consolidation Track</b> <b>CONSO2. Deep dive demo of SAP Group Reporting and SAP Group Reporting Data Collection</b>  <p>SAP S/4HANA Group reporting is gaining traction both with S/4HANA and "future" S/4HANA customers still on SAP ECC. In combination with the inherent IC reconciliation capabilities offered by Intercompany Matching &amp; Reconciliation (ICMR) and the recently released Group Reporting Data Collection Application (GRDC) . We will present and demonstrate the unique consolidation functionality, available 'Out of the Box' in Group Reporting and how the Business Content can be deployed to give you the flexibility to run your financial consolidation.</p> <p><b>Jeff Persico - Competence Lead Consolidation - element61 Bjorn Van Damme, Partner Business Analytics - element61</b></p>
	<b>BI &amp; Planning Track</b> <b>BI4. BW/4HANA Migration Tips &amp; Tricks</b>  <p>More and more SAP BW customers are embarking on a modernization journey of their SAP analytics environment. A key question for several customers is to define the exact role BW/4HANA will play in their new analytics environment and what their migration options are to move forward. During this session we will give an overview of the possible scenarios and give practical advice based on recent SAP BW/4HANA migration / implementation project experiences.</p> <p><b>Nico Sacré, Partner SAP Business Analytics - element61 Adrien Constant, Principal SAP Business Analytics Architect - element61</b></p>	<b>Consolidation Track</b> <b>PLAN3 / CONSO3. Combining SAC and S/4HANA Group Reporting to replace SAP BPC</b>   <p>One of SAP BPC's key pillars of success was its ability to cover a wide range of planning, management reporting and consolidation scenarios using a unified solution. Within SAP's next generation S/4HANA centric CPM Platform you are able to cover an even large scope by integrating different SAP reporting solution components. With SAP Analytics Cloud all financial data in SAP S/4HANA Group Reporting can be shared with the finance and business users, both at group and local levels. During this session you will learn how SAP Analytics Cloud integrates with SAP S/4HANA Group Reporting, understand the difference between Analysis for Office, embedded SAP Analytics Cloud and standard SAP Analytics Cloud as well as the possibilities to have plan data that was created in SAP Analytics Cloud. consolidate in SAP S/4HANA Group</p> <p><b>Jeff Persico - Competence Lead Consolidation - element61 Sam Reynders - SAP Analytics Competence Lead - element61</b></p>
17.30	<b>Wrap-up</b>
