

element61 Data Governance Event 2022

Date: October 18th, 2022 | Venue: Living Tomorrow
Address: Indringsweg 1, 1800 Vilvoorde

Timing	Session
12.00 - 13.00	Welcome and lunch
13.00 - 13.20	Introduction element61 <i>Stijn Vermeulen, Managing Director element61</i>
13.20 - 14.00	Introduction to Data Governance In order to stay competitive, your business decisions need to be data-driven, and your organization can't do that without trusted, reliable, and governed data. <i>Toon Puissant, Partner Analytics element61</i>
14.00 - 14.50	Automating Data Governance Implementing Data Governance processes can be overwhelming, and organizations often struggle with scattered information, resources, and the lack of engagement. Data Governance may also be perceived as a top-down initiative full of rigid and slow processes but while centrally managed standards and policies are an important aspect of Data Governance, proper tools and automation will enable users from different teams and distinct roles to collaborate and contribute to an efficient Data Governance practice. We will show you why Data Catalogs and self-service Data Quality are the first and most necessary steps in this process. <i>Petr Zacek, Managing Consultant at Ataccama</i>
14.50 - 15.40	Keeping Master Data in the best shape It is invaluable for any organization to use Master Data that is effectively managed, trustworthy, and of high quality. And while every implementation of MDM will be different based on the specific needs and use cases, Ataccama ONE MDM will support you along the way. In this session, we will start with a brief overview of MDM concepts, but we will focus on the experience of data stewards and how easy it is to manage the master data regardless of the domain or MDM style. And we will also explore how Data Catalog and metadata, in general, can be the main driver behind MDM solution design. <i>Petr Zacek, Managing Consultant at Ataccama</i>
15.40 - 16.10	Coffee Break
16.10 - 17.00	Beyond Data Stewardship - Automation and AI Many daily tasks of data stewards are focused on manual identification and resolution of various issues; however, any scalable solution must aim for as much automation as possible. In the first part of this session, you will learn more about Data Preparation and Data Quality improvement functionalities available across individual modules of Ataccama ONE Platform. And in the second part, let us guide you through various AI and ML-based features of Ataccama ONE Platform that make the life of data stewards easier - whether that means being able to simply focus on more important tasks that cannot be easily automated or using the provided suggestions and insights to resolve various issues in data or metadata. <i>Petr Zacek, Managing Consultant at Ataccama</i>
17.00 - 18.00	Closing Drink
